A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 5, 2005 has been entered.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a silicon carbide powder as required in the instant claim 1. By using the process recited in claim 1, a silicon carbide powder with high percentage of beta form and low nitrogen amount is obtained (note instant specification, page 19, line 3 to page 20, line 17). As shown in the instant specification, when a resol type phenol was used as the starting material, as disclosed in 5,863,325, the silicon carbide product has high nitrogen content and as shown in the Declaration by Mr. Otsuki (filed December 5, 2005), the claimed resol xylene resin gives an unexpected result as compared to the xylene resin used in JP '07-157,307.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
